Trump Hotel Collection Announces Trump Hotel Rio de Janeiro

January 27, 2014 -

TRUMP HOTEL COLLECTION announces the development of Trump Hotel Rio de Janeiro to be located in the posh Jardim Oceanico sub-district of the famous Barra da Tijuca borough and facing one of Rio's most magnificent beaches.

The 13-story, 171-guestroom Trump Rio will be TRUMP HOTEL COLLECTION's first property in South America and the only luxury hotel in the neighborhood when it opens in 2016.

"With the Barra da Tijuca hosting most of the venues of the 2016 Summer Olympics as well as Jardim Oceanico's perfect mix of modernity and nature, the area is poised to emerge as the heart of Rio de Janeiro," said Donald Trump Jr., executive vice president of development and acquisitions of The Trump Organization. "This is an exciting time to develop our first project in South America and the perfect location to do so."

Rio de Janeiro-based owner LSH Barra S.A. brings vital local expertise to the project, along with development consultant Polaris Brazil that has worked on a variety of innovative hospitality ventures including the Rio Convention Center. "We are thrilled to work with TRUMP HOTEL COLLECTION on the first South American addition to its prestigious collection of world-class hotels," said Paulo Figueiredo Filho, CEO of LSH Barra S.A.
