

ENR THE TOP 500

NUMBER 36

WINNING ENTRY

Dubai has been selected to host the 2020 World Expo, thanks in part to HOK's expo master plan, which includes the central pavilion, called Al Wasi.

Slow Market Recovery Leaves Firms Wanting More

The design profession has been hit hard over the past six years. By some estimates, as many as 40% of architects were unemployed during the height of the recession, in 2009. Engineers fared better but not by much. Everybody did more with less. Now, after several fits and starts over the past few years, the market finally is in recovery mode. It's no bull market, but strength is building.

This slow recovery can be seen in the data from ENR's Top 500 Design Firms list. Taken as a group, the Top 500 firms had design revenue of \$92.69 billion in

2013, up 2.7% from \$90.24 billion in 2012. This marks the third consecutive year the Top 500 experienced revenue growth since the recession began.

Market growth was modest on the domestic side. The Top 500 did see a 3.7% gain, to \$64.13 billion, in revenue from projects in the U.S. in 2013, from \$61.86 billion in 2012. This figure still has not reached the record \$68.14 billion in domestic design revenue generated in 2008. The international market was even softer: Revenue from projects outside the U.S. rose only 0.6%, to \$28.55 billion, in 2013.

Domestic public-sector markets did not fare well. Revenue from water-supply projects fell 5.6% in 2013 from 2012, and revenue from sewer and waste projects fell 5.1%. Hazardous-waste project revenue also was down in 2013, dropping 1.8%. Transportation was a bright spot in the U.S., rising 7.5%, to \$14.31 billion, fueled by a series of megaprojects.

AECOM once again topped ENR's Top 500 Design Firms list, where it has reigned for the past five years. In a major development, Michael S. Burke was named CEO on March 6, 2014, and continues as president. Burke succeeds John M. Dionisio, who becomes executive chairman of the firm.

Jacobs moved up to No. 2 on the list, powered by a series of major acquisitions over the past three years. In 2011, Jacobs acquired Aker Solutions' process-and-construction business, which consists of approximately 4,500 employees in the metals and mining markets. It also acquired KlingStubbins, a 500-person architect-engineer based in Philadelphia.

Industry consolidation continued apace in 2013. CB&I acquired Baton Rouge-based Shaw Group in February 2013. Shaw ranked at No. 13 on last year's Top 500. And Jacobs acquired Houston-based Eagleton Engineering LLC, which ranked at No. 198 last year.

Many firms are hoping for a more robust recovery. However, some executives believe a slow recovery may be a good thing. George Pierson, CEO of Parsons Brinckerhoff, says a more robust recovery may not be good for the industry, citing the potential for spikes in materials prices and possible labor shortages. "Plus, if the recovery is too quick, we risk another sudden downturn," he says. ■

How To Read the Tables

KEY TO TYPE OF FIRM

A architect, **E** engineer, **EC** engineer-contractor, **AE** architect-engineer, **EA** engineer-architect, **ENV** environmental, **GE** geotechnical engineer, **L** landscape architect, **P** planner and **O** other. Other combinations are possible. Firms classified themselves.

Companies are ranked according to revenue for design services performed in 2013 in \$ millions (*). Those with subsidiaries are indicated by (t). For information on subsidiaries and where each firm worked

outside of the U.S., see www.ENR.com. **Firms not ranked last year. Some markets may not add up to 100% due to omission of "other" miscellaneous market category and rounding. NA=Not available.

General Building as a category includes commercial buildings, offices, stores, educational facilities, government buildings, hospitals, medical facilities, hotels, apartments, housing, etc.

Hazardous Waste includes chemical and nuclear waste treatment,

asbestos and lead abatement, etc.

Industrial Process comprises pulp and paper mills, steel mills, non-ferrous metal refineries, pharmaceutical plants, chemical plants, food and other processing plants, etc.

Manufacturing includes auto, electronic assembly, textile plants, etc.

Petroleum includes refineries, petrochemical plants, offshore facilities, pipelines, etc.

Power comprises thermal and hydroelectric powerplants, waste-to-energy plants, transmission lines, substations, cogeneration plants, etc.

Sewerage, Solid Waste includes sanitary and storm sewers, treatment plants, pumping plants, incinerators, industrial waste facilities, etc.

Telecommunications comprises transmission lines and cabling, towers and antennae, data centers, etc.

Transportation includes airports, bridges, roads, canals, locks, dredging, marine facilities, piers, railroads, tunnels, etc.

Water Supply includes dams, reservoirs, transmission pipelines, distribution mains, irrigation canals, desalination and potability treatment plants, pumping stations, etc.
